DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

2. The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).
3. Claims 1,5,6,7,11-14 is rejected under 35 U.S.C. 102(e) as being anticipated by Suzuki et al., (U.S. Patent No. 5,771,030).

As per claim 1, Suzuki shows an auto-improving display flicker method
Detecting the display flicker level and producing a detection voltage; comparing the detection voltage with a predetermined voltage and automatically switching to a predetermined display flicker processing technique if the detection voltage is greater than the predetermined voltage (In abstract and In col.4 and 5) and a comparator for comparing the detection voltage with a predetermined voltage and outputting a switch control signal when the detection voltage value is greater

Art Unit: 2673

than the predetermined voltage value (In Fig.1) and video and timing control unit for switching the switch control signal into a predetermined display flicker processing (In fig.1 element 28)

As per claims 5,14 Suzuki shows a liquid crystal display is selected as the display (In Col.3 lines 50-64).

As per claim 7,Suzuki shows a band pass filter and a rectifier (In fig.1).

As per claims 11-13 Suzuki shows voltage is inputted by an adjustable device, which is an n active device, and passive device (In fig.1).

Allowable Subject Matter

Claims 15-20 are allowed.

Response to Arguments

Applicant's arguments filed on 06/02/2003 have been fully considered but they are not persuasive. Examiner would like to point out the broad based limitation as claimed in independent claims and rejected with prior art.
